HART JOEL OSAGIE

Full-Stack JavaScript Engineer | React, TypeScript, Node.js

Lagos, Nigeria (Open to Remote) | hartj8646@gmail.com | linkedin.com/in/joel-hart-39274a2ab | github.com/HartJoel | myportfoilo-nine.vercel.app

SUMMARY

Frontend-focused Full-Stack JavaScript Engineer with 3+ years building production web applications in banking and commercial settings. Frontend lead for 5 internal applications at LAPO Microfinance Bank, and builder of the Savings Flex frontend on the bank's customer-facing retail platform. Ships end to end with React, TypeScript, Node.js and PostgreSQL, with a focus on performance, accessibility and secure handling of financial data.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3

Frontend: React, Next.js, TanStack Query (React Query), Zustand, Tailwind CSS, shadcn/ui, Responsive Design

Backend: Node.js, Express.js, REST APIs, Prisma ORM, ASP.NET Core (C#)

Databases: PostgreSQL (Neon), SQL Server, Firebase

Testing: Jest, React Testing Library, Cypress, Postman

DevOps & Cloud: Git, GitHub, GitHub Actions (CI/CD), Docker, AWS, Vercel

Practices: Web Performance (Lighthouse), Accessibility (WCAG 2.1), OWASP Security, Code Review, Refactoring, Figma

PROFESSIONAL EXPERIENCE

Full-Stack Developer (Frontend Lead) | *LAPO Microfinance Bank, Lagos, Nigeria* **Jan 2024 – Mar 2025; Jul 2025 – Present**

- Lead frontend development for 5 internal business applications (scholarship examination, visitor management, staff health and welfare, budget, and litigation systems) used by 500+ staff across 10+ departments.
- Built the Savings Flex section of the bank's customer-facing web retail platform in React and TypeScript, meeting WCAG 2.1 AA with semantic HTML, keyboard navigation and ARIA labelling.
- Cut Savings Flex's initial bundle size by 35% and raised its Lighthouse performance score from 62 to 90+ through code splitting, lazy loading and image optimisation.
- Applied OWASP practices to customer financial data, adding client- and server-side input validation and safe handling of account information in forms and API calls.
- Delivered the visitor management system end to end: React frontend and ASP.NET Core (C#) REST APIs on SQL Server for authentication, reporting and visitor records.
- Refactored legacy code in the budget and litigation applications into 30+ reusable TypeScript components, reducing user-reported UI defects by 40%.
- Triage and resolve production incidents across internal applications, fixing critical bugs within 24 hours and documenting root causes to prevent repeats.
- Introduced Jest and React Testing Library unit tests and Cypress end-to-end tests (70% coverage on core flows), run through GitHub Actions CI/CD on every pull request with Docker-based environments.
- Review pull requests, mentor 2 junior developers, and turn stakeholder requirements into Figma designs and technical specifications within a 5-developer team.

Full-Stack Developer (Freelance) | *Remote* **2023 – Present**

- Delivered 12+ production web applications for e-commerce and education clients with React, Next.js, TypeScript and Tailwind CSS, including Firebase authentication and REST API integration.
- Retained 4 repeat clients through ongoing feature work, maintenance and performance fixes on live applications.

PROJECTS

Hart Mart — Multi-Vendor E-commerce Marketplace | hart-mart-frontend.vercel.app

Stack: *React, TypeScript, Zustand, TanStack Query, Node.js, Express.js, Prisma, PostgreSQL (Neon), Docker, Vercel*

- Built a full-stack marketplace with three user roles: seller registration and listings, admin review, verification and suspension of sellers, and customer browsing and cart.
- Chose Zustand for client state and TanStack Query for server state, keeping API data cached and in sync without duplicating it in a global store.
- Built the Node.js and Express.js REST API on Neon PostgreSQL, choosing Prisma for type-safe queries and migrations; added request validation and centralised error handling.
- Containerised the API with Docker and automated deployment through GitHub Actions, with the frontend on Vercel.

EDUCATION & CERTIFICATIONS

B.Sc. Computer Science, Second Class Upper | *Babcock University, Nigeria*

Certifications: CompTIA A+, CompTIA ITF+; New Horizons: Web & Mobile Development, Cybersecurity Fundamentals
